Physicians

“My patients love it. And my practice is far more efficient.”

BigBendHealth.com and its selected vendors have designed and implemented a Regional Health Information Network (RHIN) that is accessible through a secure Physicians Portal website. The RHIN can be thought of as a community based hardware and software system that brings medical information together. **The mission of the Physicians Portal is to offer a more efficient, private and secure replacement to paper, fax and phone communications between health care providers.** The graphic below illustrates the system vision:

The RHIN offers administrative cost savings to connected providers plus the framework to move Health Information Exchange (HIE) forward within our community. The BigBendHealth.com system ranks Tallahassee as a national leader in health care IT and paves the way for access to future statewide and countrywide systems.
